Why is 22Bet not working

Limitations in creating the registration record or the 22Bet site not working are inherent inconveniences when playing. Sometimes, these restrictions are regulated by the legislation of many countries and are related to age, correctness of personal data and other factors. Still, in Kenya, the casino is fully legal and accessible. The possible problems include:

- The site is unavailable in the country;
- Bad Internet connection;
- Technical failures.

It often happens that residents of Kenya go traveling, on business trips or for other reasons go out of the country. At such times, the place of departure may be restricted by 22Bet's policy and may not be available for play as it is on the list of banned countries. If this happens and the site is blocked, the only way to restore access is to use a VPN. If gamblers are in Kenya and the site is still not working, it could be a technical error. In this case, it is better to write to the support.

Customer support

The technical support service of 22 Bet works quite effectively. When contacting the company via online chat, you will have to wait about 5 minutes for a response. Judging by the reviews about the bookmaker, the company's representatives really help to solve the problems that arise with customers. However, the number of ways of communication with the bookmaker is insufficient. You can contact the company in only two ways:

- By online chat on the bookmaker's official website;
- By email address - support@22bet.com.

Unfortunately, it is impossible to contact the company's support team by phone. In addition, there is no communication with the company's representatives via social networks and messengers.
